* Indicates required question

1. Which of the following is the most effective way to protect your online accounts from unauthorized access? *

- ◯ Using a complex password and changing it every month.
- ◯ Enabling Multi-Factor Authentication (MFA/2FA).
- ◯ Using the same strong password for all academic and social accounts.
- ◯ Hiding your IP address using a free proxy.

2.You receive an email from "IT Support" asking you to click a link and log in to verify your university credentials immediately or your account will be deleted. What is the first thing you should check?

Your answer

3.Which of these are considered reliable sources for academic research? (Select all that apply)

- ☐ Peer-reviewed journals (e.g., IEEE, ACM).
- ☐ A viral thread on X (formerly Twitter).

3.Which of these are considered reliable sources for academic research? (Select all that apply)

- [ ] Peer-reviewed journals (e.g., IEEE, ACM).
- [ ] A viral thread on X (formerly Twitter).
- [ ] Official government (.gov) or educational (.edu) websites.
- [ ] Wikipedia (as a primary, citable source).

4. What does the "HTTPS" and the padlock icon in a browser address bar signify?

- ( ) The website is 100% safe and verified by Google.
- ( ) The website is free of all malware and viruses.
- ( ) The data sent between your browser and the site is encrypted.
- ( ) The website has a high privacy rating.

5. Briefly describe what a "Digital Footprint" is and give one example of how it could impact your professional life.
